scarring, computer-aided manufacturer of transparent facial masks, facial scarring, 91
Fentanyl citrate, analgesic efficacy, in burn wound care, dressing change and tubbing, comparison with morphine, children, 351
Fig leaf, decoction of as remedy for dermatitis as cause of burn injury, 229
Fire, playing with, toy packaging images and, 163
Flexion contracture, burn scars and, splinting methods for prevention and correction of, 336
Fracture, risks of, bone density after burn injury effects on, children, 279
Function, Coban effects on, burned hand, case study, 252
Fusarium infection, in burn patients, case report, 285

Fusidic acid, methicillin-resistant Staphylococci-infected burn wounds, comparison with silver sulfadiazine and mupirocin, rats, 37

Galactorrhea, refractory hypertrophic scar and, obesity role in, 392
Gene expression pattern analysis, in hypertrophic scars, 371
Grafting, skin: *see* Skin grafting

Hands, burn injury to, Coban effects on edema and function, case study, 252
Hemostasis, during burn surgery, cardiovascular effects of subcutaneous vs. topical epinephrine, 297
Hydrofluoric acid, burn injury from, after ignition of gas from compressed air duster, case report, 234

Imaging
laser Doppler, partial-thickness burn injuries analysis, serial measurements effects on accuracy of, 187
noncontact laser Doppler, burn depth in extremities analysis, 177
Infection
sepsis, swab cultures vs. tissue biopsy cultures for prediction of, 365
soft tissue, necrotizing fasciitis, management in burn centers, 127
wound, invasive, silver-sulfadiaziñe eschar pigmentation mimicking, case report, 154
Inflammatory response syndrome, base deficit during fluid resuscitation and, prospective study, 75
Integra® Dermal Regeneration Template, burn treatment effects, clinical trial, 42
Interleukin-6, outcome in burn injury and, 133
Internet, burn scar management site evaluation, 246

Lactate, serum, elevated, during fluid resuscitation, implications of, prospective study, 75
Letters to the Editor, 175

Media, glorification of burn injuries, effects on burn prevention, 159
Medicinal plant extracts, fig leaf decoction as remedy for dermatitis as cause of burn injury, 229
Mental health issues
premorbid, adult burn patients comparison with normative sample, 347
self-inflicted burn injuries, epidemiological study in Iran, 15
Methamphetamine burns, fluid requirements for resuscitation and, 275
Microstomia, oral appliance utilization for management of, long-term review, 418
Mobility, hypertrophic scars and, gene expression pattern analysis, 371
Mobilization, early, modified tilt table for preambulation strength training, in burn rehabilitation, 97
Monochloroacetic acid, skin exposure to as cause of burn injury, 407
Mood, patient, after lightening injury (letter), 175
Morphine, analgesic efficacy, in burn wound care, dressing change and tubbing, comparison with fentanyl citrate, children, 351
Mortality
Fusarium infection and burn injuries and, case report, 285
smoke inhalation and scald burn, mechanisms of, rats, 208
trends according to age, adult burn patients, 21
Movement, functional, after axillary burn scar contracture, motion analysis study, children, 104
Mupirocin, methicillin-resistant Staphylococci-infected burn wounds, comparison with silver sulfadiazine and fusidic acid, rats, 37

Neck, burn injury to, burn scar torticollis and, splinting methods for prevention and correction of, 336
Necrotizing fasciitis, management in burn centers, 127
Neisseria meningitidis, purpura fulminans and, current management, 119
Neonates, iatrogenic burn injuries, warming bottles and, 52
Nightmares, after severe burn injury, risk factors and treatment implications, 260
Nutrition Forum, protein supplementation practices, 166

Obesity, refractory hypertrophic scar and galactorrhea and, 392
Occupational therapy, physiotherapy and, in burn injury, principles and management guidelines, 323
Ointment, moist exposed burn, pain control in partial-thickness burn injury, comparison with conventional pain control methods, 289
OT/PT Forum
Coban effects on edema and function, 252
physical rehabilitation and splinting, 322
silicone gel sheeting and burn scar outcome, 410
transparent face mask manufacture for facial scarring, 90
Outcomes
burn injury, cholesterol and interleukin-6 concentrations relation to, 133
burn-related child abuse, 318
complement system changes as predictor of, severe thermal injuries, 148
purpura fulminans, current management of, 119
Oxygen therapy, home, burn injuries related to, 403

Pain management
bupivacaine infiltration prior to skin harvest effects on pain, 361
burn wound care, dressing change and tubbing, morphine comparison with fentanyl citrate analgesic efficacy, children, 351

burn-injured adults, comparison with patient satisfaction, 1
children, practices in North American burn centers, 26
extubation in burned children, propofol infusion as adjunct to, 356
partial-thickness burns, moist exposed burn ointment vs. conventional methods, 289
Patient education, silicone gel sheeting compliance effects on burn scar outcome and, 411
Patient satisfaction
burn-injured adults, comparison with self-reported pain, 1
scar assessment, patient vs. physician opinions over time, 238
Physiotherapy
exercise and, surgical intervention effects, children with thermal injury, 57
occupational therapy and, in burn injury, principles and management guidelines, 323
Pneumonia, in thermal injury, correlation of bronchoalveolar lavage with radiographic evidence of, children, 382
Posttraumatic stress disorder, burn injury survivors, psychological symptoms related to, 63
Practice guidelines, occupational therapy and physiotherapy in burn injury, 323
Protein supplementation
delivery methods, comparison study, 167
practices for burn patients, 166
Psychiatric/mental health problems
premorbid, adult burn patients comparison with normative sample, 347
self-inflicted burn injuries, epidemiological study in Iran, 15
self-inflicted burn injuries, predisposing factors for, 223
Psychological issues
burns research, children, 203
posttraumatic stress disorder symptoms in survivors of burn injury, 63
Psychosocial Forum
adjustment of siblings of children with severe burn injury, 109
nightmares after severe burn injury, 259
noncompliance after hospital discharge and premorbid mental health status of adult patients, 341
psychological impact of burn injuries, outcomes research design, 62
Purpura fulminans, current management of, 119

Rehabilitation
extension contracture of wrist 15 years after burn injury, case report, 378
modified tilt table for preambulation strength training and, 97
thermal injuries, physiotherapy and exercise effects on surgical intervention in, children, 57
Research
burns, psychological research issues, children, 203
outcomes measurement in pediatric burn care, 269
Resuscitation, fluid
base deficit during, implications of, prospective study, 75
major burn injury, intrathoracic blood volume and lung water assessment, transcardiopulmonary thermal dye vs. thermodilution methods for, 142
methamphetamine burns and, 275
Rotation contracture, burn scars and, splinting methods for prevention and correction of, 336

Scald burn, smoke inhalation and, mechanisms of, rats, 208
Scars, burn
assessment of, patient vs. physician opinions over time, 238
axillary, contracture of, functional movement after, motion analysis study, children, 104
facial scarring, computer-aided manufacturer of transparent facial masks, 91
hypertrophic, gene expression pattern analysis in, 371
management of, evaluation of Internet sites for, 246
refractory hypertrophic, galactorrhea and, obesity role in, 392
silicone gel sheeting, patient education effects on compliance and burn scar outcome, 411
torticollis, splinting method for prevention and correction of, 336
School, reentry after burn injury, therapeutic noncompliance after discharge from burn center and, 342
Sedation, extubation in burned children, propofol infusion as adjunct to, 356
Sepsis, in burn patients, swab cultures vs. tissue biopsy cultures for prediction of, 365
Silver sulfadiazine
methicillin-resistant Staphylococci-infected burn wounds, comparison with mupirocin and fusidic acid, rats, 37
pigmentation, presenting as invasive wound infection, case report, 154
Skin, burned, sternal intraosseous line placement through, 306
Skin grafting
bupivacaine infiltration prior to skin harvest effects on pain, 361
full-thickness tibial burn, tibialis anterior muscle flap for, 386
Smoke inhalation, scald burn and, mortality mechanisms in, rats, 208
Socioeconomic issues, self-inflicted burn injuries, epidemiological study in Iran, 15
Speech pathology services, utilization in burn unit, 217
Splinting, burn scar torticollis, prevention and correction methods, 336
Strength training, preambulation, modified tilt table for, in burn rehabilitation, 97
Surgery
burn, hemostasis during, cardiovascular effects of subcutaneous vs. topical epinephrine, 297

noncontact electrosurgical grounding in, 400
Swallowing disorders, speech pathology services utilization in burn unit and, 217

Temperature, body, regulation of, during exercise, burn patients, 9
Thermal injuries
carburetor-related burn injuries, management of, 50
complement system changes as outcome predictor in, 148
iatrogenic burn injuries, neonates, warming bottles and, 52
pneumonia in, correlation of bronchoalveolar lavage with radiographic evidence of, children, 382
Thermodilution, assessment of intrathoracic blood volume and, in major burn resuscitation, transcardiopulmonary thermal dye vs. thermodilution methods for, 142
Thermoregulation, during exercise, in burn patients, 9
Thymus oil, role in burn wound healing, 395
Tibia, full-thickness burn, tibialis anterior muscle flap for, 386
Tibialis anterior muscle flap, in full-thickness tibial burn, 386
Trash burning, as mechanism of burn injury, rural community, 85

Vascular access, sternal intraosseous line placement through burned skin, 306

Wound care
dressing change and tubbing, fentanyl citrate and morphine analgesic efficacy, comparison study, children, 351
silicone gel sheeting, patient education effects on compliance and burn scar outcome, 411
silver sulfadiazine, pigmentation from, presenting as invasive wound infection, case report, 154
Wound coverage, full-thickness tibial burn, tibialis anterior muscle flap for, 386
Wound healing, burn, thymus oil role in, 395
Wound infection, methicillin-resistant Staphylococci-infected burn wounds, silver sulfadiazine, mupirocin, fusidic acid effects, comparison study, rats, 37
Wrist, burn injuries, extension contracture of wrist 15 years after burn injury, case report, 378
